IGOR RIVIN

Mathematician & Universalist

@ igor@dimensionreducers.com @igriv https://impurethoughs.substack.com github.com/igorrivin
in https://www.linkedin.com/in/igor-rivin-b95257249/

EXPERIENCE

Consultant, super-Rater Elite

Turing AI

July 2025-present Princeton, NJ

Design LLM feedback in Mathematics.

Senior Advisor

Wolfram Inc

May 2023-present Princeton, NJ

Organized the 2023 ChainScience Conferences (the in-person and the virtual conferences).

Research Scientist

Edgestream LP

January 2020 – April 2023 Princeton, NJ

Working on understanding market data and developing quantitative strategies. Have worked on:

- Portfolio-based strategies.
- Optimal hedging strategies
- Machine learning based strategies
- Signal processing based strategies
- Software architecture
- Alternative data
- Extracting data from derivatives

Professor of Mathematics

Temple University

June 1999 – ongoing Philadelphia, PA

Director

The Cryptos Fund

October 2017 – October 2019 Zug, Switzerland

- Developed the `CCI30` cryptocurrency index - see `https://cci30.com`

Chief Strategy Officer

Accern, Inc

Jan 2017 – Jan 2018 New York, NY

- Developed trading strategies based on Accern's sentiment data.
- Developed the Natural Language parser.

Research Director

Ticklr, Inc

May 2017 – May 2019 London, England

- Developed Blockchain technologies for Social Media.

LIFE PHILOSOPHY

"Fluctuat nec Mergitur."

STRENGTHS

Problem Solver | Curious | Generalist

Geometry | Number Theory | Probability | Computation | Statistics | Mathematica | Data Science | Quantitative Finance

LANGUAGES

English
Russian
French
Spanish
Portuguese

EDUCATION

Ph.D. in Mathematics

Princeton University

Sept 1981 – June 1986

- Advised by William P. Thurston
- Dissertation: "Geometry of convex polyhedra in hyperbolic 3-space."

B.Sc. (Hon) in Mathematics

University of Toronto

Sept 1977 – Sept 1981

ADVISORY BOARDS

Advisory board member

iVate.com

May 2019-present

Technical Advisory Board member

Accern.com

January 2015-present

Regius Professor of Mathematics

Univesity of St Andrews

May 2015 – May 2017 | St Andrews, Scotland

Principal

Meteque Holdings

2006-2016 | Princeton, New Jersey

- Built a hedge fund (Samsara Investment Partners) which outperformed the market by wide margin for eight years, despite being a one man operation.

Member, School of Mathematics

Institute for Advanced Study

September 2010-July 2011 | Princeton, New Jersey

Berlin Mathematics Graduate School Professor

September 2011-Dec 2011

Berlin, Germany |

Visiting Professor

Stanford University

2007 | Stanford, California

ICERM professor of Mathematics

Brown University

2013-2014 | Providence, Rhode Island

Lady Davis Professor

Hebrew University

2006 | Jerusalem, Israel

Consultant

Susquehanna International Group

2005-2006 | Bala Cynwyd, Pennsylvania

- Worked in the statistical arbitrage group; developed a number of successful medium-hold-time trading strategies.

Consultant

Equities Trading Laboratory, Morgan Stanley

2004 | New York, New York

- Developed a new market impact model.
- Developed a new options trading strategy.

EPSRC Advanced Fellow (with rank of Reader)

University of Manchester

1999-2002 Manchester, UK

Warwick Research Fellow

University of Warwick

1995-1998 Coventry, UK

Olga Tausski-John Todd Instructor

Caltech

1995-1998 Pasadena, California

Research Fellow

University of Melbourne

1994-1995 Melbourne, Australia

Member, School of Mathematics

Institute for Advanced Study

1993-1994 Princeton, New Jersey

Consultant

NEC Research Institute

1991-1993 Princeton, New Jersey

- Jointly with Mike Treacy developed the subject of *hypothetical zeolites*
- Jointly with Srimat Chakradhar developed new methodology for VLSI testing.
- Made breakthroughs in computational and discrete geometry.
- Made significant contributions to Machine Learning (jointly with Yuh-Dauh Lyuuu.)

Director of Advanced Development

Wolfram Research Inc

Jan 1989-March 1991 Champaign, Illinois

- Developed large parts of the *Mathematica* kernel, including 3-D graphics, linear algebra, power series, limits, big number multiplication, solution of algebraic equations, and others.
- Supervised a group of six developers (all around the world).

Director of Applications Development, the QLISP project

Stanford University Computer Science Department

Jan 1987-Dec 1988 Stanford, California

- worked on the QLISP system for parallel symbolic computation (with John McCarthy).
- Developed algorithms for symbolic computation and task scheduling.
- Developed new methods for constraint propagation (with Ramin Zabih).

Visiting Professor

Institut des Hautes Études Scientifiques

1985-1986 Paris, France
